

## Seminar Topic: Workshop:

Professor Parnthep, serving as the Dean of the Institute of Integrated Medicine and Anti-Aging Medicine at Rangsit University, holds significant roles in academia and research. He is also the Director and Chairman of the Public Relations Subcommittee Committee for Study and Development of Drug Plant Research at Rangsit University, while simultaneously being the spokesperson for the Law and Advocacy Committee.

Professor Parnthep plays a pivotal role in preserving and revitalizing traditional Thai medicine. He leads the effort to identify and gather experienced Thai doctors who possess knowledge passed down through generations. Thai medicine, including the use of traditional herbs like marijuana, had been lost for many years. According to Professor Parnthep, this knowledge is not just found in textbooks or scriptures but is a hidden and valuable technique that has been transmitted from one generation to another. His dedication to preserving and sharing this traditional wisdom is of immense importance.
